

COPENHAGEN'S INDEPENDENT MULTI-ACTOR DIALOGUE ON SUSTAINABLE FARM TO FORK PROCUREMENT

31 May 2021 | 10:00 – 16:00 CEST

Please register for the dialogue [HERE](#)

City Food System Background Information

With the Copenhagen food strategy, we plan a new and ambitious direction for how food and meals of high culinary quality can contribute to a healthier and more climate-responsible city for all Copenhageners. The strategy comprises initiatives that help to promote Copenhagen as a food city and contribute to develop the local food system around the city, [the city of copenhagen food strategy 2019.pdf \(kk.dk\)](#).

Format of the Dialogue

The dialogue will be structured into two parts:

The **first part** will look at the opportunities for farm to fork procurement involving local and regional small and medium enterprises (SMEs) and farmers in compliance with applicable legal frameworks. Another focus will be on linking school food procurement with education. (language English)

The **second part** of the dialogue will focus on the domestic food market. Local and national stakeholders will discuss opportunities for upcoming tenders on farm to fork procurement, focussing on potatoes ('Copenhagen potato tender'). (language Danish)

Aim of the Dialogue

This event combines the Independent Dialogue of the [UN Food System Summit](#) (UNFSS 2021) with the first City-Region Multi-Actor Dialogue on 'farm-to-fork' public procurement of the [EU COACH project](#).

School food procurement, one of the currently proposed game changer solutions to the UNFSS and one entry to sustainable (urban) food systems, will be at the centre of the discussion. The Copenhagen Food Dialogue will link up with the national food dialogue being organised within the UNFSS.

Program

Time	Item	Speakers
